

Robotics and Autonomous Systems (AUTOBOT)

Kent State's College of Aeronautics and Engineering invites ambitious undergraduates to participate in a 10-week, NSF-sponsored Research Experience for Undergraduates (REU) in robotics and autonomous systems.

Engage in cutting-edge research, tackle real-world engineering challenges, and develop technical skills under expert faculty mentorship. The program also includes professional workshops to prepare you for graduate studies and career success.

RESEARCH AREAS

- Innovative Robotic Design, Artificial Intelligence (AI)
- Human-Robot Teaming
- Unmanned Aerial Vehicles (UAV)
- Guidance, Navigation, and Control (GNC) of Autonomous Systems

PROGRAM SUPPORT

- Stipend: \$6,000
- Meal allowance: \$1,000
- Complimentary on-campus housing
- Travel reimbursement up to \$500

**MAY 27-
JULY 31, 2025**
