ENGR 103: ENGINEERING IN PUBLIC SERVICE

1-CREDIT COURSE (CRN 16459)  
THURSDAYS • 4:30 PM - 5:20 PM • WALC 1121

Open to all students in the College of Engineering

This course aims to showcase the pathways for engineers in the public sector and highlight the intersectionality of engineering and government. Students enrolled in the course will learn about how their engineering knowledge can play a pivotal role in shaping public policy, and gain insight into the opportunities in the engineering fields of aerospace, environmental, civil and more within the government and its agencies.
